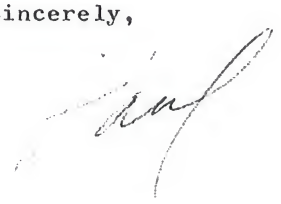
Dear Harold;

I enjoyed speaking with you yesterday. As I told you I recorded the conversation. Before phoning you I tested the tape recorder by calling the time signal three or four times and putting the phone mic. in various places on the phone to get the clearest sound. After that I phoned you and on playing the tape back I can barely hear you and my voice is loud and clear. There seems to be a lot of hash noise over the whole conversation and at times a different electronic sound covers up the talk. I don't recall hearing it at the time of the call. Your end of the converstion is barely discernable. Strange. I can't really recall all of what you said but I remember the important things. Enclosed is a copy of the article by Prouty. It is in theJuly issue of "Genesis" magazine.

There was a report on local CBS radio here today about Fensterwald saying that he has proof that the man in the photo supposedly Oswald in Mexico is really that of an assassin. You might of heard this back there before we got it out here. Is it possible this has anything to do with Mac.? Or is this more smoked herring?

Hope you are well.


Sincerely,
